

TINTUPRINT

INK BASES + PIGMENTS

- Application Guide -
Technique: Watercolor

2. GARMENT PREPARATION

- Wet the garment with water in the areas where you want to apply the watercolor technique. We recommend helping you with an atomizer.

We recommend protecting the table surface with a plastic bag.

4. DESIGN DRYING AND FIXING

- Dry the garment with a hair dryer or allow it to dry completely in the room.
- Once dry, iron the design for a better fixation.

To wash your garment after using it, we recommend using a gentle (or automatic) cycle in a domestic washing machine.

1. COLORS PREPARATION

- Take some Clear Base Ink (about 1/2 tablespoon).
- Add 1 or 2 drops of Tintuprint Series 56 and mix them slowly

Prepare how many colors you want your design to have.

3. PRODUCT APPLY

- With a brush, apply the desired color on the area of the design that you want to have greater intensity and blend it causing the tone to fade. You can moisten the garment more if necessary.

If you use multiple colors, mix them up a bit for a better effect.

5. SHOW YOUR DESIGN

- Now, your garment is ready to use.

This technique can also be used on dark garments or fabric. For this, prepare the colors using Covering Base Ink.
